FIELD WORK SUMMARY:

1. Dave Guyan arrived at the site of the "Cerro" air monitoring study at 0815 to observe the activities related to the second day of sampling. Dan Sewall and Tim Maley were finishing up the placement and calibration of the "low volume" samplers at each of the sampling locations (see Attachment A).
2. The sampling equipment locations and methods are the same as those described in the 7/16/87 Daily Field Report.
3. The air sampling completes this phase of work by E&E on Cerro's property.
4. D. Guyan took 17 pictures of the day's work.
5. D. Guyan departs site at 0930.
